UPDATE ON NEW HORIZON

Arch Mykell Jegede

Following the renewed drive for infrastructural development, things have picked up on site of the New Horizon-sponsored Babcock University ICT Resource Centre project.

According to the project manager, Engineer Folorunso Ojesanmi, in spite of the initial lull occasioned by logistics and the pandemic, things are looking good as workmen resumed again last September.

He said block work on the first floor of the project situated beside the School of Computer Sciences, is already completed and work is ongoing for the second.

Top and bottom: Work in progress at the New Horizon building site.

He is optimistic that with the commitment and speed, the project contractor, Great Grace Engineering Company will meet the expected January 2022 deadline.

For Babcock, the New Horizon project will not only expand the infrastructural development, but reinforce the existing partnership with New Horizon.
